## September is Suicide Awareness Month

Suicide is the 2nd leading cause of death for people ages 10-34 and the 4th leading cause of death for people 35-54. The overall suicide rate in the U.S. has increased by 31% since 2001.

When someone says he or she is thinking about suicide, or says things that sound as if the person is considering suicide, it can be very upsetting. You may not be sure what to do to help, whether you should take talk of suicide seriously, or if your intervention might make the situation worse. Taking action is always the best choice. Here's what to do.

### 5 Things You Should Know About Preventing Suicide

1. Everyone can help prevent suicide.
2. Know the warning signs of suicide.
3. Ask questions.
4. If someone is in crisis, stay with them and get help.
5. Suicide prevention resources are available.
